

SmartHub - Usage Explorer Tool

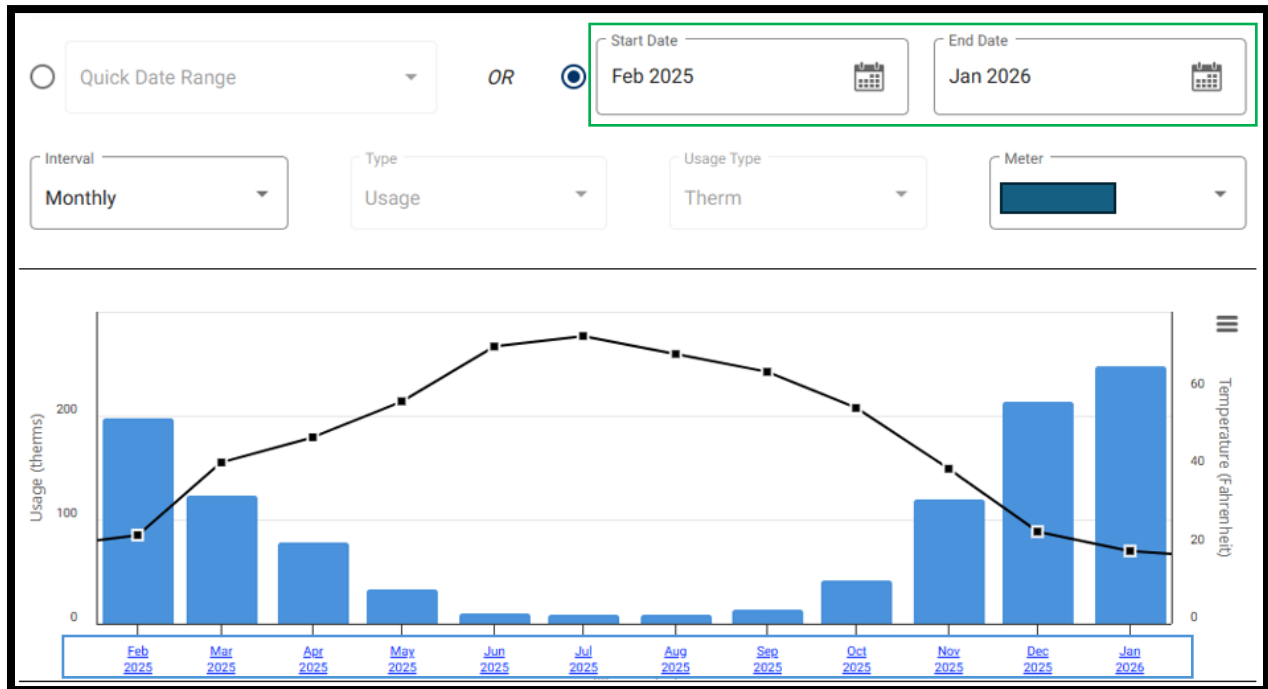

1. Log into your SmartHub account via app or visiting www.rock.coop and selecting the SmartHub button on the top of the screen 
2. Once logged in, navigate to the *USAGE* drop down menu

3. Select *Usage Explorer*

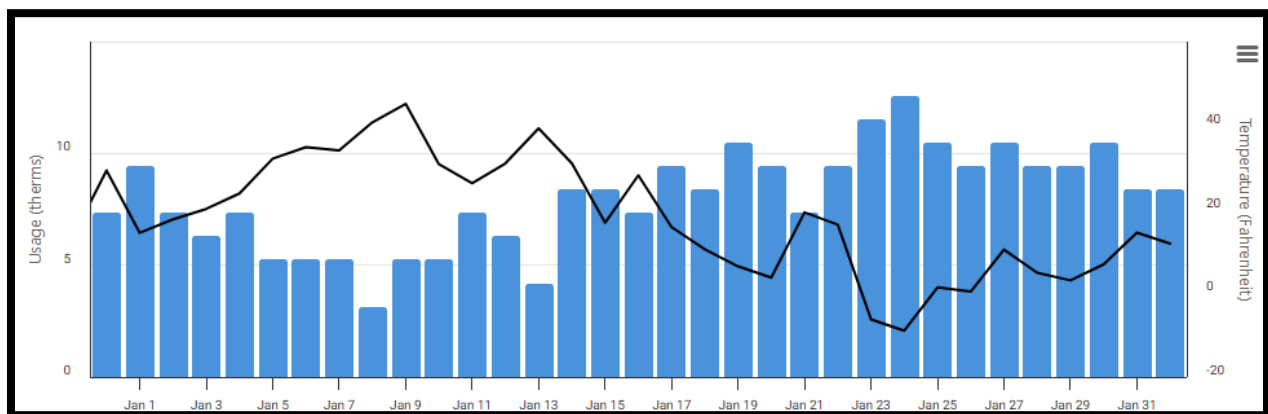

4. Once in the usage explorer you can select the desired date range by changing the Start Date and End Date or by clicking the blue hyperlink months under the bar chart.

5. After a hyperlink is selected, it will populate daily usage amounts for each day of that month. The bar chart represents daily consumption, while the black line represents daily average temperature.

In the example below, as the daily average temperature begins to fall, consumption goes up as the amount of energy required to heat a home increases.

6. For those who have both electric and natural gas with Rock Energy, you can alternate back and forth by selecting the **Meter** in the drop down.

The screenshot shows a web form for selecting energy usage data. The form includes several input fields and a dropdown menu. The 'Meter' dropdown is highlighted with a red box, showing 'GAS' selected and 'ELECTRIC' as an option. The form also includes a 'Quick Date Range' dropdown, 'Start Date' and 'End Date' fields, and 'Interval', 'Type', and 'Usage Type' dropdowns. The 'Interval' dropdown is set to 'Daily', 'Type' is set to 'Usage', and 'Usage Type' is set to 'Therm'. The 'Start Date' is set to '12/31/2025' and the 'End Date' is set to '01/30/2026'. The 'Meter' dropdown is set to 'GAS'. The 'ELECTRIC' option is also visible in the dropdown menu. The form is titled 'DAILY USAGE - 12/31/2025 - 01/30/2026'.
